

Tennessee Traveling Senior Golf Association

SITUATION: What is the worst feeling in Golf? Answer: hitting and possibly injuring a fellow golfer. Do not hit a ball into the Group ahead of you. Over the past 2 tournament events, complaints have been submitted of shots being hit into groups.

FACTORS:

- **Keep in mind that just because you can't see someone, it doesn't mean there isn't someone in your ball's path. Several courses we play have blind spots due to the various hills.**
- **Using different Tees can create some distance misinterpretations and result in incorrect club selections.**
- **The speed of play is not improved by hitting into the group in front.**
- **On occasion, one may slice, or duck hook a ball towards another hole/ fairway.**

GUIDELINE: If there is ANY chance that your shot could hit the player(s) in front of you, do not hit your ball into the group. Why run the risk of injury to fellow golfers?

PLEASE ERR ON THE SIDE OF CAUTION
